COMPANY PROFILE

About MABAN SURGICAL

MABAN SURGICAL is a Sialkot-based manufacturer and B2B supplier specializing in surgical, dental, ophthalmic and beauty instruments for international distributors, importers, healthcare suppliers and professional businesses.

- > **Manufacturing first.** Production-led thinking, from material selection to export packing.
- > **Precision focus.** Geometry, finish and function checked before shipment.
- > **Customization.** Sizes, finishes, marking and packaging built to customer requirements.
- > **B2B relationships.** Structured quotations, production updates and repeat supply.
- > **International sourcing.** Export preparation and order documentation per shipment.

YOUR BRAND · OUR MANUFACTURING

Custom & OEM / ODM

MABAN SURGICAL supports private-label brands, distributors and OEM buyers with customized manufacturing — scoped per project and confirmed in writing.

- › Custom instrument design & adaptation
- › Custom dimensions & geometry
- › Private label & custom packaging
- › Bulk manufacturing & repeat supply
- › Logo / laser marking
- › Custom finishes
- › Product development & sampling
- › Custom product sourcing

Project flow

Requirement → Technical Review → Sample → Approval → Production → Quality Inspection → Packaging → Shipment

Capabilities, tolerances and timelines are confirmed — never assumed — during technical review for each specific product.

HOW WE WORK

Manufacturing & Quality

Eight production stages

- 01** Material Selection — appropriate raw material per product requirement.
- 02** Cutting & Forming — precision shaping of components.
- 03** Machining — detailed machining and finishing operations.
- 04** Grinding & Polishing — surface refinement and finishing.
- 05** Assembly — component assembly and functional preparation.
- 06** Quality Inspection — inspection per defined requirements.
- 07** Branding & Packaging — optional branding and packing.
- 08** Export Preparation — preparation for B2B shipment.

Quality comes before shipment

Six inspection gates — incoming material, dimensional, surface, functional, visual and final packing inspection. Available documentation (inspection reports, product specifications, packing lists, commercial documentation) is confirmed per order.
